

Scope for Delta Regional Management Actions Work Group Subcommittee

The Delta Regional Management Actions Work Group (RMAWG) Regional Management Action Objectives Subcommittee is charged with meeting one to two times between RMAWG meetings 2 and 3 and articulating regional objectives related to the primary goal of improved flood risk management, as it relates to the CVFPP. The Subcommittee will review the objectives developed in Phase I, maps of flood depth and flood control facilities, and information from the IPS I and identify critical items to protect in their region (i.e., regional objectives). The Subcommittee may also draw upon its experience identifying regional objectives to refine the RMAWG's approach to this topic at meeting #3.

The Subcommittee will have access to staff and facilitation support and may set its own schedule and determine meeting locations, including phone meeting options.

All work of the Subcommittee will be reviewed by its associated RMAWG in meeting 3. The RMAWG will be offered an opportunity to revise and add to the work of the Subcommittee.
